RE: **MB Docket No. 04-233**

Dear Sir or Madam:

I am not sure of all of the technical details in this matter, but it has come to my attention this proceeding may force K-LOVE off the air. I have been a faithful listener for over three years and can scarcely remember life before them. I implore you to not cause them to go off of the air.

1. They are my solitary radio station while I am in my home area. Listening to other radio broadcasts, while traveling outside my local area, seems so different and empty. If I am traveling, I usually just turn off the radio when I reach the end of their broadcast area and wait until I reach another known K-LOVE area along the way. Hearing their call letters and familiar songs and voices always makes me feel close to home.
2. If K-LOVE were replaced by an LPFM broadcaster providing other programming, I would stop listening to radio altogether. I never know what I am going to get with other stations, but with K-LOVE I can count on their family-friendly and inspirational message every time I hear them.
3. K-LOVE is able to provide community announcements, free of charge, while also providing information on a worldwide scope. Their very existence as a listener-supported radio network is a living testimony to me and my family of the power of people banding together for a common good and rising above obstacles.
4. They consistently perform their jobs in a professional manner and have never let me down. On the contrary, they have lifted me up on several occasions with an encouraging word or focus on a positive news story.

I cannot begin to imagine how a local radio station could provide the balance and consistency I have grown accustomed to. They are an invaluable part of my daily life and would be sorely missed if they are forced off the air.

Thank you for your time and attention in this matter.

Sincerely,

Shawn Christian
